

“UV is the strongest oxidizer available to pool operators”

Professional Pool Operators of America

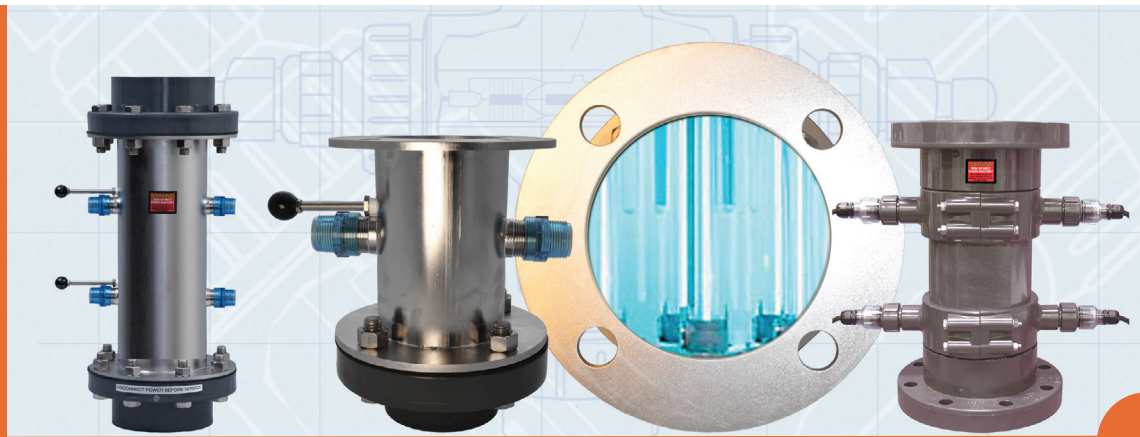

SpectraLight Ultraviolet develops UV pool sterilizers that eliminate the headaches of pool & spa ownership while minimizing dangerous chemicals. Experts agree that chlorine levels found in most pools are above what is safe for people and our environment. SpectraLight pools feature chlorine levels as low as 0.5 ppm free chlorine - up to 90% less chlorine. And with SpectraLight, you can choose low pressure or medium pressure UV.

Easily installed inline just after your pools existing filtration system, SpectraLight bombards passing water flow with a high intensity germicidal ultraviolet ray that destroys algae, bacteria, and viruses. The highly concentrated electromagnetic energy also destroys organic matter, eliminating the formation of dangerous chlorine by-products called chloramines that have been linked to red, stinging eyes, skin irritations, asthma, allergies and even some forms of cancer.

SpectraLight is both proven and safe. In fact, SpectraLight deploys the same UV technology that has sterilized drinking water for over 20 years. Ultraviolet swimming pool treatment has been used by the Olympics and is recommended by both the Centers for Disease Control and the World Health Organization. UV is so effective, the state of New York recently mandated UV sterilizers on all public water parks.

**How effective is UV?
Extremely effective.**

SpectraPro™ Commercial UV Pool Systems

Professional Series UV Sterilizers for Mission Critical Applications

- Designed for maximum output & reliability
- Quartz sleeve transmits 99.9% of UV light
- HydroClear™ dual wiper keeps sleeve clean
- Wide body for maximum UV transmission
- Extended lamp life & low replacement cost
- Sterilizes faster with greater penetration
- Available in 400 watt to 3200 watt
- Available in stainless & noncorrosive plastic
- Available in 4", 6", 8", 10", & 12" housings
- Reduce chlorine up to 90%
- Eliminates red, stinging eyes
- Eliminates skin irritation and allergies
- Reduces risk of cancer linked to chlorine
- Eliminates unpleasant pool odors
- Produces no by-products or residual
- Works automatically
- Energy efficient operation
- Environmentally friendly
